1. Introduction. Pressure ulcers (PUs), also known as a pressure sores, decubitus ulcers and bed sores, are localized injuries of the skin or underlying tissue that most often occur over bony prominences and which can be caused by any combination of pressure, shear forces or friction .PUs are internationally recognized as an important and mostly avoidable indicator of health care quality .

A care bundle for pressure ulcer treatment in intensive

1. Introduction. Cancer has long been a global threat and is the second leading cause of death 1.As one of the most common strategies for the treatment of cancer, chemotherapy remains unsatisfactory due to the low targeting ability and severe adverse effects of anti-cancer drugs2., 3..To address these problems, targeting drug delivery systems (TDDS), especially nanoparticle-based TDDS, have ...

The distinguishing feature of the rodents is their pairs of continuously growing, razor-sharp, open-rooted incisors. These incisors have thick layers of enamel on the front and little enamel on the back. Because they do not stop growing, the animal must continue to wear them down so that they do not reach and pierce the skull.

History of nanofiber production. Nanofibers were first produced via electrospinning more than four centuries ago. Beginning with the development of the electrospinning method, English physicist William Gilbert (1544-1603) first documented the electrostatic attraction between liquids by preparing an experiment in which

he observed a spherical water drop on a dry surface warp into a cone shape ...

Nanofiber - Wikipedia

How the genomic landscape of a tumor shapes and is shaped by anti-tumor immunity has not been systematically explored. Using large-scale genomic data sets of solid tissue tumor biopsies, we quantified the cytolytic activity of the local immune infiltrate and identified associated properties across 18 tumor types.

Molecular and Genetic Properties of Tumors Associated with

An international, peer-reviewed journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. In terms of therapy, palliative care is also included as part of the overall patient care process.
