A theory is underdetermined (also called indeterminacy of data to theory) if a rival, inconsistent theory is at least as consistent with the evidence. Underdetermination is an epistemological issue about the relation of evidence to conclusions.. A theory that lacks supporting evidence is generally, more properly, referred to as a hypothesis. ...

One of the defining features of the neo-liberal era has been the buildup of private debt, particularly household debt. The banks and policy makers all assured us that this was fine because wealth was being built with the debt until, of course, it came tumbling down for many as a result of the GFC.

Australia's household debt problem is not new – it is a
