Euroflex - SC1D1 - Superclean Floor Steamer - Bing Lee

Question: Every 3 out of 5 washes our washing machine will fill with water and just keep filling and filling. During this time, the water will drain out normally at the same exact time. Our washer is in an endless fill/drain cycle. It is stuck filling and draining until we unplug the machine. We sometimes just set the load to the end of the wash cycle and wait a few hours before trying again.
