install our engine control system, instrument the engine, complete the engine calibration and perform the ... is the company formed from the merger of FW Murphy and EControls in 2009. The company combines FW Murphy's full line of engine instrumentation products with EControl's extensive engine

ENGINE CONTROLS AND FUEL SYSTEMS

FW Murphy's new Engine Integrated Control System combines speed, air/fuel and ignition control in a single package designed to save you time and money. The pre-calibrated package ensures your optimal performance and the integrated system simplifies installation.

FW Murphy Production Controls

FW Murphy offers products that monitor and control compressors, pumps, generators, and more. Our control systems monitor pressure, temperature, liquid level, overspeed, time and vibration. We cover it all, from simple start/stop operation to sophisticated automation systems incorporating microcontrollers and remote communications.

Murphy has created a family of products designed around engine and motor control. Products that are rugged

and reliable - products that you can trust. Auto start/stops with first-out shutdown for engine functions, motor and throttle controllers, and a full line of DC solenoids and rack pullers.

FW Murphy Engine and Motor Controls - RJ Mann

This is a standard Murphy panel that is perfectly suited for on and off road mobile applications. The WAI Panel Series can be wired for delay on both start and stop. These panels feature a flashing light and a mini-siren which sounds an alarm for 30 seconds before shutdown, giving the operator an opportunity to pull over.

Install, Wire & Troubleshoot FW Murphy W-Series Engine Panels

(3) Isolates the internal circuitry of the Murphy EMS from the sensor input circuitry to help avoid electrical noise and damage. (4) One additional output can be ordered and traded for one digital input.
