Video game packaging refers to the physical storage of the contents of a PC or console game, both for safekeeping and shop display. In the past, a number of materials and packaging designs were used, mostly paperboard or plastic. Today, most console and PC games are shipped in jewel cases or keep cases, with little differences between them. Aside from the actual game, many items may be included ...

Video game packaging - Wikipedia

A video game console is a computer device that outputs a video signal or visual image to display a video game that one or more people can play.. The term "video game console" is primarily used to distinguish a console machine primarily designed for consumers to use for playing video games, in contrast to arcade machines or home computers. An arcade machine consists of a video game computer ...
