CIGR Handbook of Agricultural Engineering Volume II

Natural Resources Conservation Service (NRCS), formerly known as the Soil Conservation Service (SCS), is an agency of the United States Department of Agriculture (USDA) that provides technical assistance to farmers and other private landowners and managers.. Its name was changed in 1994 during the presidency of Bill Clinton to reflect its broader mission.

The SCS Runoff Curve Number method is developed by the United States Department of Agriculture (USDA) Soil Conservation Service (SCS) and is a method of estimating rainfall excess from rainfall (Hjelmfelt, 1991).

SCS Runoff Curve Number Method - Introduction - Professor

If I may take a bit different point of view: The weir is nothing more than a combination of the energy equation and Froude equation. If you were to derive it, you'd find that C is a function of only the Froude number and gravity.

Functions. Soil is a major component of the Earth's ecosystem. The world's ecosystems are impacted in far-reaching ways by the processes carried out in the soil, from ozone depletion and global warming to rainforest destruction and water pollution. With respect to Earth's carbon cycle, soil is an important carbon reservoir, and it is potentially one of the most reactive to human disturbance and ...
