DOE-HDBK-1019/1-93 NUCLEAR PHYSICS AND REACTOR THEORY. ABSTRACT. The Nuclear Physics and Reactor Theory Handbook was developed to assist nuclear facility operating contractors in providing operators, maintenance personnel, and the technical

### DOE-HDBK-1019/1-93; DOE Fundamentals Handbook Nuclear

A nuclear weapon is an explosive device that derives its destructive force from nuclear reactions, either fission (fission bomb) or from a combination of fission and fusion reactions (thermonuclear bomb). Both bomb types release large quantities of energy from relatively small amounts of matter. The first test of a fission ("atomic") bomb released an amount of energy approximately equal to ...

### Nuclear weapon - Wikipedia

Nuclear weapon designs are physical, chemical, and engineering arrangements that cause the physics package of a nuclear weapon to detonate. There are three existing basic design types: pure fission weapons were the first nuclear weapons built and have so far been the only type ever used in warfare.; boosted fission weapons improve on the implosion design. Boosting can more than double the ...

### Nuclear weapon design - Wikipedia

This section is for attacking a planet from orbit. The next section is for attacking a planet by ground assault.. After all the interplanetary battles are over, and the defender's space fleets have been reduced to ionized plasma or fled in panic, the penultimate stage is entered.

### Orbital Planetary Attack - Atomic Rockets

Enrico Fermi e uma equipe de cientistas da Universidade de Roma informou que eles haviam descoberto o elemento 94 em 1934. Fermi chamou o elemento de hesperium e mencionou o nome em sua palestra em 1938. A amostra foi na verdade uma mistura de bário, criptônio e outros elementos, mas isso não era conhecido na época, porque a fissão nuclear não tinha sido descoberta ainda.

### Plutônio - Wikipédia, a enciclopédia livre

Plutônio é um elemento químico, símbolo Pu, número atômico 94, pertencente à família dos actínidos, grupo 7. É um metal radioativo, descoberto em 1940 por Glenn T. Seaborg e sua equipe. É o elemento mais pesado produzido naturalmente na Terra. É produzido artificialmente a partir de urânio e plutônio-239.

### Physique. Le plutonium est un métal de la famille des actinides (03-04-11-01) - ATOMICA

Physique. Le plutonium est un métal de la famille des actinides présentant, comme la plupart des autres métaux, un aspect argenté brillant comme le nickel. Cependant, au contact de l'air, il se recouvre rapidement d'une couche terne grisâtre, avec des couleurs pouvant tirer sur le jaune ou le vert olive, cette dernière teinte provenant du dioxyde de plutonium [6] PuO<sub>2</sub>.
