Surface tension can be defined in terms of force or energy. In terms of force: surface tension $\hat{\gamma}$ of a liquid is the force per unit length. In the illustration on the right, the rectangular frame, composed of three unmovable sides (black) that form a "U" shape, and a fourth movable side (blue) that can slide to the right.

In mathematics, the Laplace transform is an integral transform named after its discoverer Pierre-Simon Laplace (/ l ɛ́tm ɛ́ p l ɛ́• s /).It takes a function of a real variable t (often time) to a function of a complex variable s (complex frequency).. The Laplace transform is very similar to the Fourier transform.While the Fourier transform of a function is a complex function of a real variable ...
