Introduction This document replaces The Ontario Curriculum, Grades 11 and 12: Science, 2000. Beginning in September 2009, all science programs for Grades 11 and 12 will be based on the expectations outlined in this document.

### **The Ontario Curriculum, Grades 11 and 12: Science, 2008**

Developmental biology is the study of the process by which animals and plants grow and develop. Developmental biology also encompasses the biology of regeneration, asexual reproduction, metamorphosis, and the growth and differentiation of stem cells in the adult organism. In the late 20th century, the discipline largely transformed into evolutionary developmental biology

In molecular biology, a library is a collection of DNA fragments that is stored and propagated in a population of micro-organisms through the process of molecular cloning. There are different types of DNA libraries, including cDNA libraries (formed from reverse-transcribed RNA), genomic libraries (formed from genomic DNA) and randomized mutant libraries (formed by de novo gene synthesis where ...

Microorganisms found in aerated and facultative ponds are more diverse than those observed in many other biological treatment processes, due to the diverse growth environments present. Both aerobic and anaerobic bacteria are involved as well as algae and some higher life forms such as protozoans, rotifers, daphnia, and insect larvae. The aerobic bacteria that occur are similar to those found ...
