

pipelay vessel operation manual pdf

Fig. 3 shows the proposed new procedure for the on-bottom stability with dynamic effect of offshore pipeline installation. The analysis procedures are made up three steps such as global pipelay analysis, simulation of dynamic local pipeline embedment at the TDP, and modified on-bottom stability design.

An optimum design of on-bottom stability of offshore

Dynamic positioning (DP) is a computer-controlled system to automatically maintain a vessel's position and heading by using its own propellers and thrusters. Position reference sensors, combined with wind sensors, motion sensors and gyrocompasses, provide information to the computer pertaining to the vessel's position and the magnitude and direction of environmental forces affecting its position.

Dynamic positioning - Wikipedia

The oil and gas industry uses many acronyms and abbreviations.. This list is meant for indicative purposes only and should not be relied upon for anything but general information.

List of abbreviations in oil and gas exploration and
