The Piping or Mechanical Field Engineer is a direct contributor to the safety of the work operations at the construction site. Since all safe work operations must begin with preplanning, the Field Engineer makes a direct contribution to safety by reviewing the planned work with safety in mind.

**PIPING GUIDE**

Codes Vs Standards: Codes prescribes requirements for design, materials, fabrication, erection, examination, assembly, test, and inspection of piping systems, whereas standards contain design and construction rules and requirements for individual piping components such as elbows, tees, returns, flanges, valves, and other in-line items.

**Codes and Standards extensively used in piping industry**

Bottom line is, theoretically, you can install a pipeline without a golden weld, but most often the case is, you cannot. Either you have more than 1 test section, you don't for some reason, have flanges on each end, there are a variety of reasons that require a golden weld - they are the norm, not the exception.
