PHP: Function Reference - Manual

This is a technical manual for the MediaWiki software. It contains information for developers and system administrators on installing, managing and developing for the MediaWiki software.. This manual is not for end users of MediaWiki. If you are looking for documentation to help you use MediaWiki, read the MediaWiki Handbook.

Manual:Contents - MediaWiki

Server-side cursors¶. When using QuerySet.iterator(), Django opens a server-side cursor. By default, PostgreSQL assumes that only the first 10% of the results of cursor queries will be fetched. The query planner spends less time planning the query and starts returning results faster, but this could diminish performance if more than 10% of the results are retrieved.

Databases | Django documentation | Django

Each select_expr indicates a column that you want to retrieve. There must be at least one select_expr. table_references indicates the table or tables from which to retrieve rows. Its syntax is described in Section 13.2.9.2, "JOIN Syntax". The WHERE clause, if given, indicates the condition or conditions that rows must satisfy to be selected.

MySQL :: MySQL 5.5 Reference Manual :: 13.2.9 SELECT Syntax

Documentation Stable Branch User Documentation. This documentation is for the released branches and will contain corrections and errata as they are available

PostGIS " Documentation

SELECT can also be used to retrieve rows computed without reference to any table.. For example: mysql> SELECT 1 + 1; -> 2. You are permitted to specify DUAL as a dummy table name in situations where no tables are referenced: . mysql> SELECT 1 + 1 FROM DUAL; -> 2. DUAL is purely for the convenience of people who require that all SELECT statements should have FROM and possibly other clauses.

MySQL :: MySQL 8.0 Reference Manual :: 13.2.10 SELECT Syntax

Oracle acquired Sun Microsystems in 2010, and since that time Oracle's hardware and software engineers have worked side-by-side to build fully integrated systems and optimized solutions designed to achieve performance levels that are unmatched in the industry. Early examples include the Oracle Exadata Database Machine X2-8, and the first Oracle Exalogic Elastic Cloud, both introduced in late 2010.
