MATERIAL SAFETY DATA SHEET Page 1 of 6 WP-002

A hydraulic fluid or hydraulic liquid is the medium by which power is transferred in hydraulic machinery. Common hydraulic fluids are based on mineral oil or water. Examples of equipment that might use hydraulic fluids are excavators and backhoes, hydraulic brakes, power steering systems, transmissions, garbage trucks, aircraft flight control systems, lifts, and industrial machinery.

Hydraulic fluid - Wikipedia

LUBEGARD® COMPLETE Synthetic Power Steering Fluid is engineered to outperform competitive power steering fluids in three important ways: Superior anti-wear formula significantly reduces friction, provides more potent rust and corrosion protection,

Synthetic Power Steering Fluid - LUBEGARD

A power steering fluid reservoir and pulley driven pump. Hydraulic power steering systems work by using a hydraulic system to multiply force applied to the steering wheel inputs to the vehicle's steered (usually front) road wheels.

Power steering - Wikipedia

Gold Eagle Universal Power Steering Fluid is specially formulated to meet the service requirements of virtually all domestic and imported vehicles. Universal mixes with all™ power steering fluids and helps

prevent corrosion, oxidation and wear while conditioning the entire power steering system.
