I teach 7th grade Life Science, however, about 1/3rd of my students are reading at a 5th grade level or below (as measured by iReady). Students do not get their own textbook but we sometimes use the set of textbooks in the classroom (Science Explorer by Prentice Hall, 2000 and Exploring Life Science by Prentice Hall, 1995).

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

### **Life - Wikipedia**

Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet. Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems.

### **Ecology - Wikipedia**

Biology is the science that deals with living things. In general: Living organisms react to the stimuli.; Living organisms interact with their environment, which includes members of the same and other species.; Living organisms have a metabolism: they take in food which they then convert as energy to perform their daily or day to day activities.; Living organisms reproduce: they give birth to ...

The nature of consciousness, the mechanism by which it occurs in the brain, and its ultimate place in the universe are unknown. We proposed in the mid 1990's that consciousness depends on biologically "orchestrated" coherent quantum processes in collections of microtubules within brain neurons, that these quantum processes correlate with, and regulate, neuronal synaptic and membrane ...

Resilient organizations thrive despite experiencing conditions that are surprising, uncertain, often adverse, and usually unstable. We propose that an organization's capacity for resilience is developed through strategically managing human resources to create competencies among core employees, that when aggregated at the organizational level, make it possible for organizations to achieve the ...
