Principles of Macroeconomics, Student Value Edition (12th

Macroeconomics (from the Greek prefix makro-meaning "large" + economics) is a branch of economics dealing with the performance, structure, behavior, and decision-making of an economy as a whole. This includes regional, national, and global economies. Macroeconomists study aggregated indicators such as GDP, unemployment rates, national income, price indices, and the interrelations among the ...

A discussion about the AD-AS model. Aggregate Supply is the total amount of goods and services in the economy available at all possible price levels. Aggregate Demand is the amount of goods and services in the economy that will be purchased at all possible price levels. In an economy, as the prices of most goods and services change, the price level changes and individuals and businesses change ...

In macroeconomics, aggregate demand (AD) or domestic final demand (DFD) is the total demand for final goods and services in an economy at a given time. It specifies the amounts of goods and services that will be purchased at all possible price levels. This is the demand for the gross domestic product of a country. It is often called effective demand, though at other times this term is ...
