The travelling salesman problem (TSP) asks the following question: "Given a list of cities and the distances between each pair of cities, what is the shortest possible route that visits each city and returns to the origin city?" It is an NP-hard problem in combinatorial optimization, important in operations research and theoretical computer science. ...

In mathematics and computer science, an optimization problem is the problem of finding the best solution from all feasible solutions. Optimization problems can be divided into two categories depending on whether the variables are continuous or discrete. An optimization problem with discrete variables is known as a discrete optimization. In a discrete optimization problem, we are looking for an ...

1971, O. Phillip Hicks, "The Computer: Is It the Solution or the Problem?", in ACM: Proceedings of 1971 Annual Conference, page 362: All too often, computer technology is treated as a solution in search of a problem. In fact, it is not uncommon for people working with computers to become critical of the problem

because it doesn't seem to fit the solution they have generated.
