Chapter 10. Uniform Circular Motion A PowerPoint Presentation by Paul E. Tippens, Professor of Physics ... solution of problems in circular motion. Define and apply concepts of frequency and period, and relate them to linear speed. Solve problems involving banking angles, the conical pendulum, and the vertical circle.

### Chapter 10. Uniform Circular Motion

These problems allow any student of physics to test their understanding of the use of the four kinematic equations to solve problems involving the one-dimensional motion of objects. You are encouraged to read each problem and practice the use of the strategy in the solution of the problem.

### Sample Problems and Solutions - physicsclassroom.com

Probability Questions with Solutions Tutorial on finding the probability of an event. In what follows,  $S$  is the sample space of the experiment in question and  $E$  is the event of interest.  $n(S)$  is the number of elements in the sample space  $S$  and  $n(E)$  is the number of elements in the event  $E$ .
