A double-track railway usually involves running one track in each direction, compared to a single-track railway where trains in both directions share the same track.

Double-track railway - Wikipedia

The track on a railway or railroad, also known as the permanent way, is the structure consisting of the rails, fasteners, railroad ties (sleepers, British English) and ballast (or slab track), plus the underlying subgrade. It enables trains to move by providing a dependable surface for their wheels to roll upon. For clarity it is often referred to as railway track (British English and UIC ...
