

### **reservoir engineering pdf**

Reservoir simulation is an area of reservoir engineering in which computer models are used to predict the flow of fluids (typically, oil, water, and gas) through porous media

### **Reservoir simulation - Wikipedia**

A reservoir (from French *rÃ©servoir* "a "tank") is a storage space for fluids. These fluids may be water, hydrocarbons or gas. A reservoir usually means an enlarged natural or artificial lake, storage pond or impoundment created using a dam or lock to store water. Reservoirs can be created by controlling a stream that drains an existing body of water.

Mission Statement. The Dworshak Reservoir Association (DRA) is a citizen-based group of reservoir users founded to collect, focus and provide information about reservoir management to association members, managers and the general public. The DRA will work with federal, state, county and local government agencies on current and future activities on and around the reservoir.
