Summary Subprime mortgage bubble. The precipitating factor for the Financial Crisis of 2007-2008 was a high default rate in the United States subprime home mortgage sector - the bursting of the "subprime bubble". While the causes of the bubble are disputed, some or all of the following factors must have contributed.

Almost two years ago, I started getting reader emails asking me if student loan refinancing was a good idea, and if a company called SoFi was a good place to do it. Never having carried such a loan myself I wasn't sure if I was qualified to answer, but other emails were coming in reporting positive results with the company.
