

rosen discrete mathematics 7th pdf

In mathematics, a set A is a subset of a set B , or equivalently B is a superset of A , if A is "contained" inside B , that is, all elements of A are also elements of B . A and B may coincide. The relationship of one set being a subset of another is called inclusion or sometimes containment. A is a subset of B may also be expressed as B includes A ; or A is included in B .

Subset - Wikipedia

In elementary mathematics, a variable is a symbol, commonly an alphabetic character, that represents a number, called the value of the variable, which is either arbitrary, not fully specified, or unknown. Making algebraic computations with variables as if they were explicit numbers allows one to solve a range of problems in a single computation. A typical example is the quadratic formula ...
