I have a 2007 Saturn Sky with an automatic transmission. The car started downshifting quite hard whenever I slowed down. It did this on its own as I don't ever shift the transmission. It went away for about a week but then started doing it again. Then it did it again and the check engine light came on but it did not flash. Now it

it always downshifts hard and the light stays on.

When an automatic transmission like the GM 5L40-E changes gear, oil is fed into a sealed chamber, forcing a piston to push against a stack of clutch plates. If the oil were just shot into that chamber all at once, the clutch pack would apply with a harsh thud and make for a very unpleasant driving experience.
