

section 6 3 biodiversity pdf

Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Biodiversity - Wikipedia

The loss of biodiversity is increasing. There is massive extinction from human activity. For example, fish stocks are dwindling, forest loss is resulting in the loss of many species, land and other resources are being misused, leading to various long term costs.

This document takes as its starting point the assumption

Integrating Biodiversity into Environmental Management Systems

Biodiversity is important, more than just the 'I want my children to enjoy it' reason. For example, the richness of diversity allows medicines and foods to be naturally available. The natural disaster prevention mechanisms in most ecosystems and other free services we all get from the surrounding environment are not easily replaceable or replicable, so maintaining biodiversity is important.

Why Is Biodiversity Important? Who Cares? – Global Issues

Forestry in India is a significant rural industry and a major environmental resource. India is one of the ten most forest-rich countries of the world along with Russia, Brazil, Canada, United States of America, China, Democratic Republic of the Congo, Australia, Indonesia and Sudan.

Edit Text: . Conservation International was a pioneer in defining and promoting the concept of hotspots. In 1989, just one year after scientist Norman Myers wrote the paper that introduced the hotspots concept, CI adopted the idea of protecting these incredible places as the guiding principle of our investments.

Barlow: Rewilding is a concept that works with restoration ecology and evolution combined. One type of rewilding deals with restoring lost biodiversity. Restoration ecology is when you look at a landscape and ask how we can bring it back to conditions that are more natural, say, before Europeans arrived in North America.
