Introduction and Subject. Theoretical Perspective The theoretical perspective taken toward emotional development in childhood is a combination of functionalist theory and dynamical systems theory 1: A childâ€™s encounters with an environment can be seen as dynamic transactions that involve multiple emotion-related components (e.g., expressive behaviour, physiological patterning, action ...

Emotions - Encyclopedia on Early Childhood Development

Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.
