Software testing is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation.

Software testing - Wikipedia

Design is the discipline of creating solutions that work well for people. It brings together multi-disciplinary skills to focus our efforts to create happy users, developers and administrators alike.

IBM Design: design in motion

1. Introduction. Software development has been characterized by harmful disconnects between important activities, such as planning, analysis, design and programming.

Continuous software engineering: A roadmap and agenda

Application software (app or application for short) is computer software designed to perform a group of

coordinated functions, tasks, or activities for the benefit of the user. Examples of an application include a word processor, a spreadsheet, an accounting application, a web browser, a media player, an aeronautical flight simulator, a console game or a photo editor.
