Automated Dynamics is a world leader in the design of automation equipment for composite part production; we build right-sized, automated fiber placement (AFP) and automated tape laying (ATL) equipment for thermoset and thermoplastic applications.

Automation Equipment | Automated Dynamics - Composite

A machine (or mechanical device) is a mechanical structure that uses power to apply forces and control movement to perform an intended action. Machines can be driven by animals and people, by natural forces such as wind and water, and by chemical, thermal, or electrical power, and include a system of mechanisms that shape the actuator input to achieve a specific application of output forces ...

Machines employ power to achieve desired forces and movement ().A machine has a power source and actuators that generate forces and movement, and a system of mechanisms that shape the actuator input to achieve a specific application of output forces and movement. Modern machines often include computers and sensors that monitor performance and plan movement, and are called mechanical systems.
