An experiment is a procedure carried out to support, refute, or validate a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.

View all technologies available for licensing Collaboration Opportunities. Collaborations with industry and small businesses support the Labs' primary missions and help companies bring exciting technologies to the marketplace as new and improved products.

MicroElectroMechanical Systems (MEMS)

Warp-field experiments are a series of current and proposed experiments to create and detect instances of spacetime warping. The ultimate goal is to prove or disprove the possibility of spacetime metric engineering with reasonable amounts of energy.

Warp-field experiments - Wikipedia

11. SAFETY FIRST - Chemistry experiments should be done in a controlled, carefully supervised environment such as a school lab (laboratory) or learning center lab unless specifically designed to be safe as a home experiment. Children must be constantly supervised by informed responsible adults educated in lab safety. Never work alone. If you plan on doing any experiments of any kind, pay ...
