Optical Gaging. With the great variety of new gaging equipment on the market, an easy and practical approach is sometimes overlooked. Many are discovering that inspection with the use of an Optical Comparator, a custom Chart-Gage and a Staging Fixture or a Tracer is economical and requires little experience.

In statistics, the standard score is the signed number of standard deviations by which the value of an observation or data point is above the mean value of what is being observed or measured. Observed values above the mean have positive standard scores, while values below the mean have negative standard scores. The standard score is a dimensionless quantity obtained by subtracting the ...

In medicine and statistics, gold standard test is usually diagnostic test or benchmark that is the best available under reasonable conditions. Other times, gold standard is the most accurate test possible without restrictions.. Both meanings are different because for example, in medicine, dealing with conditions that would require an autopsy to have a perfect diagnosis, the gold standard test ...
