Information technology is defined as any equipment or interconnected system or subsystem of equipment that is used in the acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, telecommunications, or reception of data or information.

Office of Management and Enterprise Services (OMES)

Reservoir characterization overview. Reservoir characterization encompasses all techniques and methods that improve our understanding of the geologic, geochemical, and petrophysical controls of fluid flow. It is a continuous process that begins with the field discovery and all the way through to the last phases of production and abandonment.

Geostatistical reservoir modeling - petrowiki.org

Every business is basically a system of complicated processes that work together to produce a product or a service. The processes include the staff, the equipment, the communication, the linkages and everything else that helps to ensure business operations continue as normal.
