Applegate Group, Inc. Water Resource Advisors for the West We've been trusted by private companies, ditch companies, water districts, municipalities, and state and federal government agencies since 1985.

### **Applegate Group, Inc. | Water Resource Advisors for the West**

Superheated water is liquid water under pressure at temperatures between the usual boiling point, 100 °C (212 °F) and the critical temperature, 374 °C (705 °F). It is also known as "subcritical water" or "pressurized hot water." Superheated water is stable because of overpressure that raises the boiling point, or by heating it in a sealed vessel with a headspace, where the liquid water is ...
